PHILADELPHIA, TUESDAY, SEPTEMBER 15, 1914.

PRICE ONE CENT

ALWAYS A CHANCE FOR DRINK VICTIM IN ST. PAUL'S CLUB

Derelicts Lifted From Seemingly Hopeless Degradation and Made Useful and Self-respecting Citizens.

A sodden wreck of a man shuffled along the river front and wondered how long it took to drown. He had had a long fight with John Barleycorn-and he had lost. He had nothing to live for. He had lost everything he had to lose, family, friends, business and health. The whisky had even taken away his appetite for food, and now he could not even get whisky. So he nerved himself and crept closer to the butkhead. The waves murmured invitingly.

A laborer on his way to work noticed the lotterer and intercepted him. There was a short conversation and the two went off together. They turned in at 411 Lombard street-Old St. Paul's Club-and the man to whom death had called was put to bed. Then, in the brutally direct parlance of the street, he "went to the

The club might be called the house of the last chance. Its avowed object is to give to the man who has lost everything, who has given up the fight against liquor, another chance.

As a matter of fact, St. Paul's gives

CANADA BECOMES FERTILE FIELD FOR AMERICAN EXPORTS

man Wars and Stoppage of European Trade Creates Receptive Market.

Great opportunities are available for the establishment of an enormously in creased export trade with Canada in "made in America" goods, according to Dudley Bartlett, chief of the Foreign Trade Bureau of the Philadelphia Com. mercial Museums. are a direct result of the European war, through the action of the Canadian Minister of Customs in prohibiting the importation into Canada of goods from Germany and Austria-Hungary. The imports from these two countries into Canada amounted in round numbers to sig. 000,000 annually. It was also pointed out that the imports from France, Belgium and Russia, which for the time being are as effectively cut off as if they were forbidden, amounted approximately to \$20,000,000 a year. So this prohibited and interrupted import trade of Canada totals

"It is reasonable," Chief Bartlett says, "to assume that Canada will be in the will have to be imported is a reasonable assumption. It is hardly likely that the Canadian manufacturers at this time are in a position to make up the deficit, though they may seize the moment to develop along the necessary manufacturimportation from Great Britain or from the United States. It is hardly reasonable to expect that British manufacturers will be able to take advantage of the present opportunity. On the other hand, it would not be surprising if imports from the mother country, which amounted to \$139,646,356 last year, should

be temporarily curtailed."

The present opportunity for American manufacturers in Canada is principally in the lines here enumerated. And to the importation on the lines given from
